# Folding Arm Awnings by LUKRIS

TRADING PTY. LTD.

[www.lukris.com.au](http://www.lukris.com.au)

The Brustor B-35 is a full cassette folding arm awning with compact dimensions (200mm high x 182mm deep) that make it suitable for just about every situation. With the choice of over 150 colours, the B35 is a stylish and discrete unit which makes it ideal for either modern

or traditional architecture. The awning is built around a 50mm X 30mm steel tube back rail, and retractable arms that are 71mm high. The arms use an integrated draw spring system which requires 4 stainless steel cables due to its superior tension.

For more information contact:
